

What is Business Vision Integrated System.

The software is for Fixed Assets/Non Current Asset Register. Assets can be analysed by eight analyses. This means that assets can be reported by e.g. Province, Station, District, Location, User Department, Area, Division etc.

The system allows you to establish good reputation of your organisation by having all the information you need regarding your assets

Advantages of the system

The software has the following unique features .

- ☑ Customizable features
- ☑ Local Support
- ☑ 250 plus reports
- ☑ Easy to use
- ☑ Affordable
- ☑ Unlimited database size
- ☑ Integrated system
- ☑ Multiuser system
- ☑ High speed processing
- ☑ Internal system audit by Consultants by performing data validation, verification and correction before External Audit.
